

MEET

5th Grade Math Teacher

Bridget Royce

Mrs. Royce has been with Westlake City Schools for ten years and teaches 5th grade math. Recently, Mrs. Royce and Mrs. Germano (Science) collaborated on a grant from National Geographic wherein their students designed a habitat for preventing local pollinator extinction. The students used evidence-based solutions, designing the project while applying what they learned in class, with a focus on making a positive impact on the local environment. “The students really blossomed with technology,” Mrs. Royce said. “We’re so proud of the work they did and how they applied themselves to this project.” She added that they are hoping to prep their garden this summer with installation happening in the fall.

What is your favorite part of working with Westlake City Schools?

I love the students and the enthusiasm they bring. And I really love getting to know them and their families. Especially when I get to teach sets of siblings over the years. Also, we have a great team of teachers. We get to know each other over time and grow professionally and refine our practice together. It’s so inspiring to see all the amazing projects the teachers are doing with their students.

What do you enjoy doing in your free time?

I really love to cook, so trying new recipes is really fun. I also enjoy gardening and planning what I’m going to plant each season. I also enjoy spending time with my two young children and taking family walks. My husband Anthony and I have a 4-year old son and 1-year old daughter and dog, Winston – I really enjoy my family time.

If you could have any meal right now, what would you have?

My favorite restaurant is Schmidts in Columbus’ German Village. My favorite meal there is Bahama Mama Sausage with Potato Pancakes Applesauce and a Jumbo Vanilla Cream Puff.

If you could visit anywhere on the planet, where would you like to visit?

Hilton Hawaiian Village in Oahu, Hawaii. I’d like to hang out on the beach and visit Duke’s Waikiki for some beachside breakfast.
